

Stakeholder Analysis (Power / Interest)

Field	Value
Team name (English — this goes in the file name)	Insurance
Team lead	Administration: Ahmed Eissa / Plan: Asia Al-Jabrine and Jihad Yasser / Policies: Assaad Lutf / Client: Isma Razi
Number of members	20 (Administration 3, Plan 6, Policies 6, Client 2, Accounting 3)
Scenario / Project	Direct Billing Medical Insurance System (Egypt), all modules: Admin, Plan, Policies, Client, Accounting
Submission date	27 September 2026

Output levels

Level	What it covers
MUST	At least 6 stakeholders (أصحاب المصلحة), internal and external · Power (النفوذ) and Interest (الاهتمام) rated with justification · correct quadrant (الربع) placement · a handling strategy per quadrant.
SHOULD	Communication channel and frequency per group · potential opponents identified with the reason they would object.
ADVANCED	A RACI matrix for the project's key decisions.

Approved tools

Step	Approved tool	Note
Brainstorming and voting	This document — Section 1	No separate tool. Voting happens in the same table.
Rating Power and Interest	This document — Section 2	The ratings and the justifications live here, in writing.
Power/Interest Grid	Miro · Power/Interest Grid	Build it in Miro, export an image, paste it in Section 3.
Strategy and communication	This document — Section 4	—
Persona (البيرسونا)	This document — Section 5	Only for the one or two most important people in Manage Closely.
RACI (optional)	Miro · Simple RACI Matrix	Build it in Miro, export an image, paste it in Section 6.
AI usage	ChatGPT, Claude or Gemini	Any of them — record the prompt and who on the team used it.
Reference reading only	MindTools · Mendelow Grid	References for the concept, not tools you submit from.

Work split

Member	Responsible for exactly what	What they produced
Asia Al-Jabrine : Plan Team lead	Managing the Plan Team's business analysis activities, identifying stakeholders, assessing their power and interest levels	Plan Team stakeholder list and ratings (Sections 1 and 2)
Jihad Yasser : Plan Team co-lead	Co-leading the Plan Team analysis with Asia Al-Jabrine	Plan Team analysis (Sections 1, 2 and 4)
Plan Team members	Worked on the strategy, communication channels, Miro grid and persona checks, and reviewed FRA compliance	Plan Team input to Sections 3, 4, 5
Assaad Lutf : Policies Team lead	Led the Policies analysis: stakeholders, Power/Interest ratings and personas	Policies input to Sections 1, 2, 5, 7 (source of Persona 1)
Other Policies Team members	Ran the brainstorm and vote, wrote the strategy and opponents, built the Miro grid, and checked the personas and FRA rules against the BRD	Policies input to Sections 3, 4, 7
Isma Razi: Client Team lead	Stakeholder identification and analysis, Persona S1, Power/Interest grid for the Client portal	Client stakeholder list, ratings and first Miro grid (Sections 1 to 3 and 5)
Hamdi : Client Team	User Persona S2 and team voting	Persona S2 and the agreed Power/Interest grid
Engy Elyamany : Accounting Team	Accounting module stakeholder analysis	Accounting stakeholders, strategy table, opponents, personas, first RACI draft (input to Sections 4, 6, 7)

Member	Responsible for exactly what	What they produced
Ahmed Eissa , Ali, Amira : Administration Team	Administration module stakeholders and ratings, five persona cards, Administration BRD(draft version)	Administration input to Sections 1, 2, 5 (source of Persona 2)
Consolidation : all team leads	Merged the five analyses, settled the rating conflicts, and built the final Miro grid and RACI	Final Sections 2, 3, 6

1 · Brainstorming and Voting

#	Stakeholder	Role / Entity	Internal / External	Proposed by	Votes	In scope?
1	Project Sponsor / Senior Management (CEO)	Executive management, funds the programme	Internal	Client, Plan, Accounting, Policies	4	Yes
2	Product Owner / Project Manager	Product and project management	Internal	Admin, Plan	2	Yes
3	Group Super Admin (System Admin)	Administration (entities, users and roles)	Internal	Admin, Client, Accounting	3	Yes
4	Underwriting & Policy Operations Lead	Underwriting / Policy Department	Internal	Policies, Client, Admin, Accounting	4	Yes
5	Finance / Accounting & Billing Manager	Finance & Accounting Department	Internal	Policies, Client, Plan, Accounting, Admin	5	Yes
6	Corporate HR Admin (Client Representative)	Corporate client (buys the policy, runs the portal)	External	Policies, Client, Accounting	3	Yes
7	Financial Regulatory Authority (FRA)	Egyptian government regulator	External	Policies, Plan, Admin	3	Yes
8	IT Security Officer / IT Manager (CISO)	Information Technology & Security	Internal	Admin, Plan	2	Yes
9	Internal Compliance & Risk Manager	Internal Audit, Compliance & Risk	Internal	Admin, Plan	2	Yes
10	Department Heads / Operations Managers	Medical & Insurance Operations	Internal	Admin, Plan	2	Yes
11	Client Account Manager	Client department (renewals)	Internal	Client, Accounting	2	Yes
12	Department System Users (accountants, ops staff)	Daily users in all departments	Internal	Accounting, Admin	2	Yes
13	Insured Member (Employee & Dependents)	End beneficiary of the corporate policy	External	Policies, Client	2	Yes
14	Healthcare Provider Desk (Hospital / Pharmacy)	Hospital and pharmacy admission desks	External	Policies, Client	2	Yes
15	IT Support & System Operations	Technical support / infrastructure	Internal	Client, Policies	2	Yes

#	Stakeholder	Role / Entity	Internal / External	Proposed by	Votes	In scope?
16	Insurance Broker / Corporate Agent	Sales intermediary	External	Policies	1	No
17	Claims Manager / Claims Officer	Claims & TPA module (out of scope)	Internal	Plan	1	No
18	Data / Business Analyst	Reporting & statistics	Internal	Client	1	No
19	Customer Support / Call Center	Member support	Internal	Policies	1	No
20	Physical Card Printing Vendor	External supplier (replaced by e-cards)	External	Policies (AI)	0	No
21	Claims Adjudication Doctor	Medical claims review	Internal	Policies (AI), Client (AI)	0	No

2 · Rating Power and Interest

Code	Stakeholder	Power	Why this Power score	Interest	Why this Interest score	Quadrant
S01	Project Sponsor / Senior Management (CEO)	5	Owns the budget and signs off each phase gate, so he can pause or stop the whole programme.	3	Follows ROI and the go-live date at a high level. He does not work with the screens or the daily workflow.	Keep Satisfied
S02	Product Owner / Project Manager	5	Owns the scope and priorities for all five modules. Nothing goes into a sprint unless they approve it.	3	Sets the priorities, then follows progress through sprint reviews and sign-off points. The daily module work is done by the teams.	Keep Satisfied
S03	Group Super Admin (System Admin)	4	Sets up the entities (Underwriter, Subsidiary, Country) and all roles and permissions. Nobody can work until he configures their access.	5	Uses the Admin module every day, and any access or audit problem comes to him first.	Manage Closely
S04	Underwriting & Policy Operations Lead	5	Signs off every policy and the approval-authority matrix. A policy cannot go live without his approval.	5	Works in the Plan and Policies modules every day (endorsement queue, roster checks, policy status).	Manage Closely
S05	Finance / Accounting & Billing Manager	4	Approves invoices and refunds, and can hold the go-live if premiums and endorsements do not match.	3	Gets involved at month-end closing and when invoices or refunds need approval. The daily entries are done by the accountants (S12).	Keep Satisfied
S06	Corporate HR Admin (Client Representative)	4	The client who pays. If the portal is hard to use, they can move the contract to another insurer at renewal.	5	Adds and removes employees every month and receives the invoices, so any mistake reaches their staff directly.	Manage Closely
S07	Financial Regulatory Authority (FRA)	5	Has legal power to fine the company or stop its operations if	2	Only looks at compliance evidence, such as the audit trail and	Keep Satisfied

Code	Stakeholder	Power	Why this Power score	Interest	Why this Interest score	Quadrant
			records or National ID checks break the rules.		10-year data retention.	
S08	IT Security Officer / IT Manager (CISO)	4	Can stop a release that fails the security checks (2FA, encryption, data isolation between branches).	3	Gets involved at security and infrastructure checkpoints only.	Keep Satisfied
S09	Internal Compliance & Risk Manager	4	Signs off audit and data-privacy readiness and deals with FRA inside the company. A serious finding from them stops go-live.	3	Checks the audit log and risk reports from time to time, but is not part of daily operations.	Keep Satisfied
S10	Department Heads / Operations Managers	3	Can request changes and escalate issues for their teams, but others approve the system scope.	5	Their teams' daily workflow and access requests change directly with the new system.	Keep Informed
S11	Client Account Manager	3	Manages the client relationship and renewals, but has no say in system decisions.	4	Needs clients to onboard easily and get clear invoices so they renew.	Keep Informed
S12	Department System Users (accountants, ops staff)	2	They do their tasks in the system but cannot change its rules or roles.	5	They use the system all day for invoices, payments and policy data, so every extra step slows them down.	Keep Informed
S13	Insured Member (Employee & Dependents)	2	A single employee cannot change the policy limits or waiting periods.	5	If the e-card is inactive or the limit is wrong, treatment is refused at the hospital.	Keep Informed
S14	Healthcare Provider Desk (Hospital / Pharmacy)	2	Only checks eligibility for direct billing and cannot change policy data.	4	Needs a fast, correct eligibility answer at admission to avoid queues and billing disputes.	Keep Informed
S15	IT Support & System Operations	2	Fixes tickets and keeps the platform running, but does not decide on requirements.	2	Only involved when there is an incident, downtime or a new release.	Monitor

Quadrant	Meaning	Who is in it
Manage Closely	High Power · High Interest	S03 Group Super Admin, S04 Underwriting & Policy Ops Lead, S06 Corporate HR Admin
Keep Satisfied	High Power · Low Interest	S01 Project Sponsor / Senior Management, S02 Product Owner / Project Manager, S05 Finance / Accounting Manager, S07 FRA, S08 IT Security / IT Manager, S09 Internal Compliance & Risk
Keep Informed	Low Power · High Interest	S10 Department Heads / Operations Managers, S11 Client Account Manager, S12 Department System Users, S13 Insured Member, S14 Healthcare Provider Desk
Monitor	Low Power · Low Interest	S15 IT Support & System Operations

4 · Strategy and Communication

Quadrant	Handling strategy	Channel	Frequency	Core message	Owner
Manage Closely	Consulted before every decision that affects their module. They review the requirements and acceptance criteria and sign off before we build.	Working workshops (face-to-face) + dedicated Teams channel + BRD review comments	Weekly, and before any major decision	What we need you to approve, and the options we have.	Product Owner / Lead BA
Keep Satisfied	Consulted only at formal checkpoints. We show them that budget, security and FRA requirements are covered and keep them out of daily tickets.	Executive brief + formal milestone review + compliance evidence pack (audit-log export)	Monthly + at each phase gate	Your requirements are covered and here is the evidence. We contact you only if a checkpoint is at risk.	Project Manager
Keep Informed	Informed after decisions are made. They test and give feedback, but they do not decide.	Sprint demos, UAT sessions, release notes and user guides; SMS or in-app messages for members and providers	Bi-weekly (each sprint) + at each release	What changed, when it starts, how it affects your work, and where to send feedback.	Change Management / assigned BA
Monitor	No regular messages. We watch the dashboards and contact them only when there is an incident or a release that affects support.	System-health dashboard + incident tickets	Quarterly review / exception-driven	Platform status and any change that affects support.	IT Ops Lead

Potential opponents (SHOULD HAVE)

Stakeholder	Expected reason for objection	How we handle it
S06 Corporate HR Admin	Used to emailing Excel files, so she may push back on required fields like the 14-digit National ID, especially at month-end.	Drag-and-drop Excel upload with an error-preview report that shows exactly which rows to fix before committing.
S04 Underwriting & Policy Ops Lead	Fears losing control if endorsements and activations are automated and a high-risk group is issued without review.	Auto-approve only standard low-risk groups. Anything above the limit or with a waiver goes to an underwriter approval queue.

Stakeholder	Expected reason for objection	How we handle it
S05 Finance / Accounting Manager	Does not trust automatic pro-rata premiums yet and worries that mid-term additions and removals will not match the invoices.	Agree a Billing Cut-off Date rule, keep maker-checker approval on refunds, and deliver an endorsement-to-billing reconciliation report each cycle.
S12 Department System Users	Worried about extra work in busy periods and about being blamed when the system makes a mistake.	Include some of them in UAT and give short training plus a pilot period before the full switch.
S10 Department Heads / Operations Managers	Expect the switch to slow down daily work and access approvals for their teams.	Roll out one department at a time, give managers a "My Team" screen for access requests, and demo the process before go-live.
S08 IT Manager / CISO	Concerned about the integrations (Claims/TPA, finance system, FRA portal) and about keeping each branch's data separate.	Share the integration plan and security requirements early, and make security sign-off a step before each release.

5 · Persona (البيرسونا)

Field	Persona 1	Persona 2
Name / Code	S06: Noha Mansour	S03: Eng. Tarek El-Shenawy
Role and entity	Senior HR Operations Specialist, external (corporate client with about 600 employees)	Group Super Admin, internal (Head of Core Systems)
What he actually cares about	Adding employees and their families without paperwork, and getting a correct invoice every month.	Adding a new branch or user himself, without waiting for the developers.
What worries him about the project	Long data-entry screens during hiring season, and new employees being turned away at the hospital.	A setup mistake that gives someone access to medical data they should not see.
How he measures success	The e-card works from the employee's first day, and the invoice matches her headcount.	A new branch is live in under 3 working days, and a permission change takes less than 5 minutes.
How he decides — and who he listens to	Decides based on what is easy to use and what employees complain about. Listens to payroll and her HR director.	Looks at the data before deciding. Listens to the Product Owner and the CISO.
Preferred channel and available time	Short afternoon calls or email summaries. Busy with payroll in the last week of the month.	Prefers written specs and short working sessions over long meetings.
A sentence that means the project is working	I upload the new hires in two minutes and they see their cards on their phones the same day.	I set up the new branch with the wizard in a few minutes, and the audit log recorded every change.

6 · RACI matrix — optional (ADVANCED)

R = does the work · A = accountable for the outcome (exactly one per row) · C = consulted · I = informed

Miro template · Simple RACI Matrix

<https://miro.com/app/board/uXjvHhhf5SQ=?moveToWidget=3458764685095974790>

RACI Matrix: key project decisions

R does the work · A accountable, exactly one per row · C consulted · I informed · A/R accountable and does the work

Decision / Activity	Sponsor (S01)	Product Owner (S02)	Super Admin (S03)	Underwriting Lead (S04)	Finance Mgr (S05)	Corporate HR (S06)	Compliance & Risk (S09)	IT Security (S08)
Approve project scope & budget	A	R	I	C	C	I	I	I
Approve the consolidated BRD & priorities	I	A	C	C	C	C	C	C
Set up entities, roles & permissions (RBAC)	-	C	A/R	I	I	-	C	C
Define plans, benefits & authority matrix	I	C	R	A	C	-	C	-
Issue policies & approve endorsements	-	I	-	A/R	I	C	-	-
Upload employee census (add / remove members)	-	I	-	C	I	A/R	-	-
Generate invoices & approve refunds	-	I	-	C	A/R	I	C	-
Audit log & FRA compliance reporting	I	I	R	-	-	-	A	C
Security sign-off before release	I	C	R	-	-	-	C	A/R
Go-live decision	A	R	C	C	C	I	C	C

Checked row by row: every activity has exactly one A. Roles use the codes from Section 2.

7 · AI Usage

Mandatory. If this section is empty, the submission is rejected.

Stage	Who on the team	The prompt you used	What you accepted and changed — and why	How you verified it
Brainstorming (Policies module)	Assaad Lutf (Policies Team)	Suggest potential stakeholders for the Policies Module of a corporate group health insurance system in Egypt, internal and external.	Accepted 5 roles (Underwriting, HR Admin, Finance, Member, Broker). Dropped Claims Doctor (claims is out of scope) and Card Printing Vendor (digital e-cards). Added FRA and Healthcare Provider Desk from the BRD.	Cross-checked with the Policies feature list and BRD scope boundaries.
Brainstorming & rating (Accounting module)	Accounting Team	Suggest potential stakeholders for an accounting module of a direct-billing medical insurer serving corporates, then rate Power/Interest 1 to 5 for the in-scope names only.	Accepted 7 and dropped 10 that were out of scope or repeated per department. Kept one person per department and adjusted the ratings to match the real accounting flow.	Compared with the business model/flow, the org hierarchy and mentor feedback.
Strategy, opponents & persona (Accounting module)	Accounting Team	Build the Strategy & Communication table (strategies must differ by decision authority), then Potential Opponents, then personas for Manage Closely.	Kept the channels, frequency and owners, rewrote the messages in our own words, and matched each opponent's handling to its quadrant.	Checked against the handling-strategy table and the manual (as-is) process.
Brainstorming (Client portal)	Isma Razi (Client Team)	Suggest stakeholders that might be impacted by or influence the insurance client portal.	Kept the names already identified by the team; rejected the AI's extra names (Brokers, Claims handler) as out of scope.	Referred back to the agreed client-portal scope.
Reviewing & brainstorming (Administration module)	Ahmed Eissa, Ali, Amira (Administration Team)	Review our stakeholder list and Power/Interest ratings for the Administration module of a direct-billing medical insurance system in Egypt. Suggest changes and any stakeholders we missed.	The AI suggested 12 stakeholders. We dropped 8 that were outside the Administration module or the business scope. Our final Administration list has 9 stakeholders (Group Super Admin, Product Owner, CISO, FRA, Chief Underwriter, Subsidiary Admin, Department Heads, Internal Compliance, General System Users). It also helped us with the analysis and research.	Did our own research, asked a second AI model the same question, and compared with example stakeholder analyses.
Consolidating the five teams	Ahmed Eissa	Merge the five team stakeholder analyses into one list for the whole system, remove duplicates, re-rate 1 to 5	Accepted the merged list of 15. We moved the Underwriter from Keep Satisfied to Manage Closely because it signs	Checked each quadrant against the scores, checked the RACI row by

		with reasons, and draft a RACI with one A per row.	off policies, dropped Broker and Claims because only one team chose them, kept Manage Closely to 3 names by moving the Product Owner and Finance Manager to Keep Satisfied, and fixed rows that broke the >3 = High rule.	row, and compared the names with the Admin BRD and each team's file.
