

Business Requirements Document (BRD)

وثيقة متطلبات الأعمال الشاملة

	[Insert Project Name / Insurance Client Portal]
Project Name / اسم المشروع:	
Document ID / رقم الوثيقة:	BRD-[PR]-001
Date / التاريخ:	2026-10-02
Author (BA) / مُعد الوثيقة:	[Insert Business Analyst Name / Isma Razibaouene Client team lead]
Version / الإصدار:	1.0

1. Document Control & Approvals | ضبط الوثيقة والموافقات

1.1 Revision History / سجل التعديلات

Version / الإصدار	Date / التاريخ	Author / المُعد	Description / وصف التعديل	Approved By / اعتمد بواسطة
0.1	02/10/2026		Initial Draft / المسودة الأولى	[Reviewer Name]
1.0		[BA Name]	Final Baseline Version / النسخة المعتمدة النهائية	[Sponsor Name]

1.2 Sign-off & Approvals / اعتماد الوثيقة

Role / الدور	Name / الاسم	Title / المسمى الوظيفي	Signature / التوقيع	Date / التاريخ
Project Sponsor	Isma Razibaouene	Lead BA client team	_Isma Razibaouene	02-10-2026
Business Lead	Hamdi	BA		02-10-2026

2. Table of Contents | جدول المحتويات

(يتم إنشاؤه تلقائياً في مستند وورد / Auto-generated in Word)

3. Executive Summary | الملخص التنفيذي

- This project proposes the development of a centralized insurance management solution for organizing and managing the core activities of an insurance business. The solution will connect clients, insurance plans, policies, and financial operations in one controlled environment.

The platform will support the full operational lifecycle of insurance services. It will help users configure insurance products, register and manage clients, issue and maintain policies, record financial transactions, and produce reliable management information. The solution is intended to improve operational efficiency, strengthen data accuracy and increase transparency

4. Project Background & Problem Statement | خلفية المشروع وصياغة المشكلة

4.1 Business Context / خلفية العمل

Describe the background and environment that led to this project. / وصف السياق والبيئة التي أدت إلى إطلاق هذا المشروع.

4.2 Problem Statement / صياغة المشكلة

Element / العنصر	Description (English)	(الوصف بالعربية)
The Problem Of / المشكلة هي	-Slow clients onboarding process . Tracking - No Clear tracking of premiums, payments, refunds, balances, and financial performance	
Affects / تؤثر على	Clients /	
Impact / الأثر	Insurance	
Proposed Solution / الحل المقترح	Automated platform that centralizes activities across insurance module	

5. Project objectives

- **OBJ-01: (Self-Service Onboarding):** Enable new clients to complete digital onboarding independently in under **10 minutes** from any device.
- **OBJ-02: (24/7 Account & Financial Visibility):** Provide clients with **100% real-time transparency** into their policy premiums, pending and completed payments, refunds, and total balance directly through the portal dashboard.
- **OBJ-03: (Instant Confirmation & Status Tracking):** Eliminate blind spots by offering automated real-time status updates and instant receipts for all submitted financial transactions and requests.
- **OBJ-04: (Customer Satisfaction):** Achieve a **4.5/5 (or 85%+)** Client Satisfaction Score (CSAT) regarding ease of use and accessibility within 6 months post-launch.

- **OBJ-05 (Reduction in Support Friction):** Reduce client reliance on phone and email support for basic financial inquiries or onboarding checks by **60%**.

6. Scope (In-Scope / Out-of-Scope) | نطاق المشروع

6.1 In-Scope / المشمول في النطاق

Client Onboarding / finance tracking/

6.2 Out-of-Scope / غير المشمول في النطاق

- Claims /

7. Stakeholders & Business Workflows | أصحاب المصلحة وسير العمل التجاري

7.1 Stakeholder Matrix (RACI) / مصفوفة أصحاب المصلحة

Role / الدور	Department / الإدارة	RACI Status	Impact Level / مستوى الأثر
Project Sponsor	Executive Management	Accountable (A)	High / عالٍ
Business User	Operations	Responsible (R)	High / عالٍ
Compliance Officer	Legal & Risk	Consulted (C)	Medium / متوسط
IT Support	IT Operations	Informed (I)	Low / منخفض

7.2 Key User Personas / فئات المستخدمين الرئيسية

- **Persona 1 -**

8. Current State vs. Future State | الوضع الحالي / الوضع المستقبلي

8.1 Current State (As-Is Process) / الوضع الحالي

Manual Onboarding process : The current onboarding workflow is heavily manual and relies on sequential handoffs between the prospective client, underwriting team, and internal support staff.

- **Step 1: Underwriting Investigation:** The underwriter manually investigates client eligibility and policy risks prior to account activation.
- **Step 2: Iterative Document Requests:** The underwriter manually requests multiple proofs (e.g., identity verification, financial records, eligibility documents) from the prospective client via disparate communication channels (email, phone, or paper submission).
- **Step 3: Manual Onboarding & Account Setup:** Once proofs are submitted and approved, operational staff manually process the onboarding files and set up the client's account details within internal systems.

Identified Pain Points & Bottlenecks

- **High Processing Delays:** Manual document collection and physical/email handoffs prolong total onboarding time.
- **Document Chasing & Friction:** Clients face repetitive requests for evidence, causing frustration and drop-offs during intake.
- **Lack of Visibility:** Neither the client nor internal stakeholders have real-time tracking for document status or eligibility progress

8.2 Future State (To-Be Process) / الوضع المستقبلي:

The Future State transforms the client onboarding and policy management journey from a slow, manual process into a centralized, transparent self-service experience through the Client Portal.

1. Digital Self-Registration & Onboarding Intake

- **Action:** The prospective client registers directly on the Client Portal and fills out guided digital application forms.
- **Benefit:** Eliminates paper/email form submissions and minimizes manual data entry errors.

2. Centralized Document Upload & Dynamic Checklists

- **Action:** The portal provides clients with a clear checklist of required verification proofs based on their application details.
- **Benefit:** Clients upload documents directly into secure fields with automated file-type and basic validation checks, eliminating redundant back-and-forth communication.

3. Real-Time Application & Underwriting Status Tracking

- **Action:** Clients access a visual status dashboard showing real-time updates as their application moves through underwriter review.
- **Benefit:** Removes communication gaps and eliminates the need for clients to call or email for progress updates.

4. Automated Notification & Account Activation

- **Action:** Upon underwriting approval, the system sends automated portal and email notifications to the client.
- **Benefit:** Provides instant confirmation, immediate access to policy documents, and seamless activation of client features.

5. Self-Service Financial Management

- **Action:** Clients view and track policy premiums, payment history, account balances, and processing refunds anytime via their portal dashboard.
- **Benefit:** Delivers 24/7 financial transparency and empowers clients with complete visibility over their accounts.

9. High-Level Functional Requirements | المتطلبات الوظيفية عالية المستوى

Req ID	Requirement Description (English)	وصف المتطلب (العربية)	Priority (MoSCoW)
BR-001	The system shall allow client to login his account		Must Have
BR-002	The system shall maintain the session active when the client is logged in		Must Have
BR-003	The system shall send SMS notifications upon onboarding and payment status updates	يجب أن يرسل النظام إشعارات نصية عند تحديث الحالة.	Should Have
BR-004	The system shall allow the client to update their profile details		
BR-005	The system shall allow the client to upload required eligibility proof documents during onboarding		
BR-006	The system shall allow track the application status in real-time		
BR-007	The system shall allow the ckient to view policy premiums, transaction hitory		

10. Non-Functional Requirements | المتطلبات غير الوظيفية

Non-Functional Requirements | المتطلبات غير الوظيفية

10.1 Performance & Scalability | الأداء والسعة

- **NFR-PERF-01 (Response Time):** The portal client interface shall render pages and complete search/filter requests within **2 seconds** under normal operating conditions.
- **NFR-PERF-02 (Concurrent Users):** The client portal shall support up to **5,000 active concurrent client sessions** without degradation in performance.
- **NFR-PERF-03 (Document Upload Speed):** The system shall accept document proof uploads (up to 10 MB per file) and confirm receipt within **3 seconds**.

10.2 Security & Data Privacy | الأمان وخصوصية البيانات

- **NFR-SEC-01 (Data Encryption):** The client portal shall encrypt all client data in transit using **TLS 1.3** and data at rest (including uploaded identification documents) using **AES-256 encryption**.
- **NFR-SEC-02 (Session Security & Timeout):** The client session shall automatically terminate after **15 minutes of inactivity** to prevent unauthorized access.
- **NFR-SEC-03 (Data Isolation):** The system shall strictly enforce role-based access controls to guarantee that clients can only view and interact with their own policy and financial records.

10.3 Usability & Accessibility | سهولة الاستخدام والإمكانية

- **NFR-USA-01 (Responsiveness):** The portal user interface shall be fully responsive across mobile phones, tablets, and desktop browsers (Chrome, Safari, Edge, Firefox).
- **NFR-USA-02 (Multi-Language Support):** The interface shall support seamless switching between **Arabic** and **English** languages across all screens and notifications.
- **NFR-USA-03 (Ease of Navigation):** The onboarding workflow shall allow a first-time client to complete document submissions in **no more than 3 distinct UI steps**.

FEATUTRE LIST CLIENT SIDE

1. Authentication & Account Management

- **Self-Registration & Profile Creation:** Allows prospective clients to create an account using email, phone number, or single sign-on (SSO).
- **Multi-Factor Authentication (MFA):** Secure login via SMS or email One-Time Passwords (OTP).
- **Profile & Contact Management:** Self-service updates for personal information, contact numbers, emergency contacts, and notification preferences.
- **Password Management & Recovery:** Self-service password reset and security preference controls.

2. Digital Onboarding & Verification Portal

- **Guided Application Intake:** Step-by-step dynamic digital forms for submitting insurance applications without paper files.
- **Document Vault & Dynamic Proof Checklist:** Upload secure eligibility proofs (e.g., ID cards, proof of income, medical history) with clear file requirement guidance.
- **Document Validation Feedback:** Instant inline alerts for unreadable files, missing pages, or unsupported file formats.
- **Application Tracker:** Visual status bar tracking application progress (e.g., *Submitted Underwriting Review /Approved*

3. Financial & Payment Hub

- **Real-Time Financial Dashboard:** Instant visibility into current policy premiums, total account balance, outstanding payments, and upcoming due dates.
- **Online Premium Payments:** Secure online payment portal supporting credit/debit cards, bank transfers, or recurring auto-pay setups.
- **Refund & Transaction History:** Detailed audit trail of all past transactions, premium deductions, and claim/policy refund statuses.
- **Digital Receipts & Invoices:** Instant download of payment confirmation receipts and official tax invoices in PDF format.

4. Policy Management & Self-Service

- **Policy Overview Dashboard:** Active policy breakdown, coverage details, policy limits, effective dates, and deductible summaries.
- **Digital Policy Documents:** Centralized repository to view, download, or print official insurance certificates and policy terms.
- **Endorsement / Modification Requests:** Submit digital requests to change policy coverage, add dependents, or update insured assets.

5. Communication & Support Center

- **Omnichannel Notifications:** In-portal notifications, automated SMS, and email alerts for application status updates, payment due dates, and document approvals.
- **Support Ticket Creation:** Raise inquiry tickets for underwriting, claims, or general support with status tracking.
- **Help Center & Interactive FAQ:** Searchable knowledge base addressing common client questions regarding onboarding, premiums, and policy rules.

11. Integration Points | نقاط التكامل والربط

System Name / اسم النظام	Integration Type / نوع الربط	Data Flow & Purpose / تدفق البيانات والهدف	Frequency / التكرار
--------------------------	------------------------------	--	---------------------

Core ERP System	REST API	Send approved requests data / إرسال بيانات الطلبات المعتمدة	Real-time / فوري
SMS Gateway	Web Service	Dispatch OTP & notifications / إرسال رموز التحقق والإشعارات	Event-driven / عند الحدث

12. Success Criteria — Definition of Done | تعريف النجاح — معايير النجاح

12.1 Key Performance Indicators (KPIs) / مؤشرات الأداء الرئيسية

- KPI-01: Reduce manual task processing time by 50% / 50% تقليل زمن المهام اليدوية بنسبة /

12.2 Business Definition of Done (DoD) / تعريف الإنجاز التجاري

- [] Scope and objectives approved by Sponsor & Stakeholders / اعتماد النطاق والأهداف من الراعي وأصحاب المصلحة
- [] As-Is and To-Be processes documented and agreed upon / توثيق العمليات الحالية والمستقبلية والموافقة عليها
- [] Requirements tagged with unique IDs and mapped to business goals / تتبع المتطلبات بمعرفات فريدة وربطها بالأهداف
- [] Integration points and business rules defined / تحديد نقاط الربط والتكامل والقواعد التجارية

13. Risks, Issues, Assumptions & Dependencies | المخاطر، المشاكل، الافتراضات

والاعتماديات

13.1 Risks & Mitigation / المخاطر وخطة الحد منها

Risk ID	Risk Description / وصف المخاطرة	Impact / الأثر	Mitigation Strategy / خطة الحد والتخفيف
RSK-01	Delay in third-party API integration / تأخر الربط مع واجهة نظام خارجي	High / عالٍ	Prepare mock APIs for parallel development / تجهيز واجهات وهمية للتطوير الموازي

13.2 Assumptions & Dependencies / الافتراضات والاعتماديات

- ASM-01: Users have valid active corporate credentials / يفترض أن لدى المستخدمين بيانات دخول نشطة
- DEP-01: Upgrade of core database engine before deployment / تحديث محرك قاعدة البيانات الأساسية قبل الإطلاق

14. Modification History | تاريخ التعديلات

(Cross-referenced with Section 1.1 لضبط الوثيقة / 1.1 قسم مربوط مباشرة)

15. Glossary | قاموس المصطلحات

Term / المصطلح	Definition (English)	(التعريف) بالعربية
----------------	----------------------	--------------------

BRD	Business Requirements Document	وثيقة متطلبات الأعمال
Sponsor	Individual approving budget and project scope	الشخص أو الجهة الممولة والمُعتمدة للمشروع ونطاقه
SLA	Service Level Agreement	اتفاقية مستوى الخدمة
